Kolkata, India

OBJECTIVE

Computer Science undergraduate with a foundation in Python, Java, C, Data Structures and Algorithms, and frontend development, along with an interest in Data Science and Machine Learning. Seeking an internship to apply my technical skills to real-world projects, gain practical experience, and continue developing my problem-solving abilities.

EDUCATION

B.Tech in Computer Science Engineering (Core) *Kolkata, India*
Techno Main Salt Lake
CGPA/SGPA: 8.47 / 10 *2024 –2028*

Programming in C and Java, Data Structures and Algorithms, Object-Oriented Programming, Python Programming, Database Management Systems, SQL, Probability and Statistics, Linear Algebra, Operating Systems, Software Engineering, and Computer Networks.

TECHNICAL SKILLS

- Programming Languages: Python, Java, C
- Data Structures & Algorithms: DSA in C and Java
- Data Science & Machine Learning: NumPy, Pandas, Data Analysis, Data Visualization, Machine Learning
- Web Development: HTML, CSS, JavaScript, React
- Databases: SQL, DBMS
- Tools & Platforms: Git, GitHub, Jupyter Notebook

PROJECTS

Open Bank Management System

Technologies: Python, Streamlit, JSON, OOP, File Handling

- Developed a Streamlit-based banking application supporting account creation, deposits, withdrawals, and account management.
- Applied Python OOP, exception handling, and JSON-based file storage to manage account data.

IBVAP

Technologies: Python, YOLO, FastAPI, Node.js,Express, TypeScript, Prisma,Next.js, React, Tailwind CSS,Hyperledger Fabric

- Built an AI-powered border surveillance platform for threat detection and video analytics.
- Integrated ML-based object detection, real-time alerts, and blockchain-based evidence tracking.

ARTHSETU

Technologies: Python, Scikit-learn, XGBoost, Prophet, FastAPI, Next.js, React, TypeScript, PostgreSQL, PostGIS

- Developed an AI-powered platform for rural business feasibility analysis, market intelligence, and credit readiness.
- Integrated ML-based demand prediction, commodity price forecasting, financial feasibility analysis, and government loan scheme matching.

KRISHI RAKSHA

Technologies: Python, Scikit-learn, XGBoost, Machine Learning, Blockchain, Solidity, FastAPI

- Developed a crop insurance platform combining ML-based fraud detection, yield prediction, and damage verification.
- Integrated blockchain-based claim auditing to improve transparency and automate claim processing.

ACHIEVEMENTS

- Smart India Hackathon (SIH): Reached the national-level final stage as part of a participating team.
- Oxford Debate: Winner of an Oxford-style debate competition.
- GMUN: Selected as a finalist at GMUN.
- Academic Performance: Maintained an average semester GPA of 8.47/10 across four semesters.
- Class XII: Scored 92% in Higher Secondary Education.
- College Group Discussion: Ranked among the Top 10 participants in the college-level GD selection round.

HACKATHONS, DEBATES & LEADERSHIP

- Participated in 10+ hackathons and developer competitions across Kolkata and other cities.
- Built and presented projects across AI/ML, full-stack development, and Web3.
- Participated in 10+ debates and Model United Nations (MUNs), developing public speaking, research, and argumentation skills.
- Strengthened teamwork, communication, and problem-solving through technical competitions and group discussions.
